People

Geoffrey M. Geise, Ph.D.

Geoffrey M. Geise is an Associate Professor in the School of Engineering and Applied Science at the University of Virginia. He received his Ph.D. from the University of California, Berkeley in 2008. He is currently working on the development of new materials for energy storage and conversion. He is also interested in the development of new materials for the environment. He is a member of the American Chemical Society and the American Society for Materials.

Geise Group Members

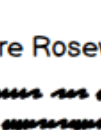

Taylor Finnegan

Taylor Finnegan is a graduate student in the School of Engineering and Applied Science at the University of Virginia. He received his B.S. from the University of Virginia in 2015. He is currently working on the development of new materials for energy storage and conversion. He is also interested in the development of new materials for the environment. He is a member of the American Chemical Society and the American Society for Materials.

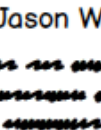

Jasper Richard

Jasper Richard is a graduate student in the School of Engineering and Applied Science at the University of Virginia. He received his B.S. from the University of Virginia in 2015. He is currently working on the development of new materials for energy storage and conversion. He is also interested in the development of new materials for the environment. He is a member of the American Chemical Society and the American Society for Materials.

Claire Rosewood

Claire Rosewood is a graduate student in the School of Engineering and Applied Science at the University of Virginia. She received her B.S. from the University of Virginia in 2015. She is currently working on the development of new materials for energy storage and conversion. She is also interested in the development of new materials for the environment. She is a member of the American Chemical Society and the American Society for Materials.

Jason Wu

Jason Wu is a graduate student in the School of Engineering and Applied Science at the University of Virginia. He received his B.S. from the University of Virginia in 2015. He is currently working on the development of new materials for energy storage and conversion. He is also interested in the development of new materials for the environment. He is a member of the American Chemical Society and the American Society for Materials.

Undergraduate Researchers

Dennis Feinstein

Dennis Feinstein is an undergraduate student in the School of Engineering and Applied Science at the University of Virginia. He received his B.S. from the University of Virginia in 2015. He is currently working on the development of new materials for energy storage and conversion. He is also interested in the development of new materials for the environment. He is a member of the American Chemical Society and the American Society for Materials.

Owen Applewood

Owen Applewood is an undergraduate student in the School of Engineering and Applied Science at the University of Virginia. He received his B.S. from the University of Virginia in 2015. He is currently working on the development of new materials for energy storage and conversion. He is also interested in the development of new materials for the environment. He is a member of the American Chemical Society and the American Society for Materials.

Jessica Morris

Jessica Morris is an undergraduate student in the School of Engineering and Applied Science at the University of Virginia. She received her B.S. from the University of Virginia in 2015. She is currently working on the development of new materials for energy storage and conversion. She is also interested in the development of new materials for the environment. She is a member of the American Chemical Society and the American Society for Materials.

Quincy Adams

Quincy Adams is an undergraduate student in the School of Engineering and Applied Science at the University of Virginia. He received his B.S. from the University of Virginia in 2015. He is currently working on the development of new materials for energy storage and conversion. He is also interested in the development of new materials for the environment. He is a member of the American Chemical Society and the American Society for Materials.
